Q4. **Kei i a koe ētahi atu whakaaro? Anything you would like to add?**

I think a fortnightly red bin collection would be fine for us most of the time. However, I would like the option of being able to take excess red bin rubbish (within limits) to a depot without attracting a high charge for doing so. A low cost and degradable pre pay bag (e.g. available at a supermarket/dairy) would be an acceptable option for this occasional red bin excess. This would provide a means for limiting volume.

Q1. **He aha tāu e pirangi ai mo te kohinga pararopi?** Option 1 - Business as usual (no organics collection)

**What is your preferred option for organic waste collection?**

Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi?If you have selected Option 1, what are your main concerns about an organics collection service?**

I would prefer an opt in / out programme - we feed all food scraps to chickens, which I am sure a lot of rural families do, so we don't want to have a rates increase to cover a service we don't need

Q3. **Mēnā kua tohua ko Option 4, 5 rānei, kei te** not answered

Q1. **He aha tāu e pirangi ai mo te kohinga pararopi?** Option 5 - Mixed food organics and garden organics (FOGO)  
**What is your preferred option for organic waste collection?** collection

Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi?If you have selected Option 1, what are your main concerns about an organics collection service?**

I haven't selected option 1- I wondered whether it would be more carbon effective to provide whānau w the tools to do composting within their own backyards rather than a collection service. We are a whānau who are able to compost and deal with our green waste on our own whenua so are unlikely to utilise this service. I get that it will take a bit of a culture change but it would be so good!! Just like how we had to get used to not smoking inside in the pub anymore, or wearing bike helmets! We may moan a bit initially but we do get their eventually! I'm not the expert though and I know you guys would have looked at this so am interested in the rationale as to why it hasn't been included as an option.

We are absentee owners. A bin system does not work for us as we are often not there on collection day. And we do not have a gateside collection, we have to take rubbish to a central collection point

We need to encourage people to compost, not take away this responsibility- a better option is education and possibly establishing community composting too, where people can 'donate' their food waste if they feel unable to home compost.

Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi?If you have selected Option 1, what are your main concerns about an organics collection service?**

not answered

Q3. **Mēnā kua tohua ko Option 4, 5 rānei, kei te whakaae koe kia kohi o para ia rua wiki, ā he pai ki te utu he \$35 ki te kohi o para ia wiki?If you have selected Options 4 or 5, do you agree with fortnightly rubbish collection, or would you want to pay an extra \$35 per year for weekly rubbish pick up?** I would prefer to pay \$35 extra for weekly rubbish collection

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

I think at least FO only weekly would be good and maybe GO fortnightly if needed but a combined FOGO seems like the easiest option to divert the most waste from landfill

Q5. **Kei te pīrangi koe ki te kōrero ki te Kaunihera?** Kāo - No

The smell and having to clean the bin after each empty would drive me nuts. My red bin is always lined so I avoid bacteria build up and insect infestation. The rubbish that goes inside is also in bin liners providing extra cleanliness and contains smell.

One of my concerns is where do you put the extra bin? The existing bins take enough space as it is and they are ugly to look at and some smaller properties will be struggling to find a place to put them. Also it will be another ongoing increase in rates.

I already separate out all my organic waste, with worm farm and composting bins. I have invested in this infrastructure at home and do not want increased rates to pay for a service I will not use. Why don't you spend the money on giving people a worm farm and a composting bin and educate them with reading information and schools so that the kids grow up to understand and will do better than our generation. Think longer term.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

It would be great to learn more about the difference between separate food and garden waste collection compared to a join collection. Has the organic waste more value when it is collected separately? Also it might be useful to offer increase pick up in summer (weekly) due to having more garden waste and going to a fortnightly pickup in winter.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

I agree with fortnightly rubbish collection but I am from a small and already environmentally concious family. Some people may need some time to come around to the idea of less rubbish collection. Also large families may struggle with fortnightly collection, it doesn't seem fair to make them pay just because of the many people in their household. I wonder if it can be graded based on the people in the house? For example, 4 people and under fortnightly collection, pay \$35 if weekly wanted. 5-8, pay \$25 if wanted weekly, 8 and over pay \$10 if wanted weekly.

It would increase my costs and is unnecessary as I live rurally and all organic matter is used on the farm

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

Rural communities need to be excluded from this charge as they would have other methods of dealing with organic waste and it is unlikely that this would be used.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

I wondered if the organics/food collection could be optional or urban only? I can't imagine it will be too helpful for rural properties, who very likely already have something for this type of waste. Maybe a survey for rural properties on what they do with their food/organic waste? My property is rural and I would have no use for this service and it would only cost me more money when life is already really expensive as it is. I voted option 5 as a "greater good" option for the environment, but I would prefer it was optional or not needed for rural properties. Tauranga/WBOP gets around this because TCC have a food waste and optional garden waste but most of their houses are urban. Whereas WBOP operate in the same area but don't offer food/organic waste because most of their properties are rural. I'd imagine Rotorua is sort of 50/50 and should think about how this service isn't likely critical for rural properties

- Q1. **He aha tāu e pirangi ai mo te kohinga pararopi? What is your preferred option for organic waste collection?**
- Option 4 - Separate food organics (FO) and garden organics (GO) collection
- Option 5 - Mixed food organics and garden organics (FOGO) collection
- 
- Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi?If you have selected Option 1, what are your main concerns about an organics collection service?**

- I would prefer to pay \$35 extra for weekly rubbish collection
- 
- Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**
- I think weekly rubbish pickup would reduce the possible waste could get blown out of too full bins, we should reduce the household waste we produce and leave behind in the environment but when the bin is too full and it's windy there's not much you can do to stop some things from blowing away adding more rubbish to the environment.

I think that most rural properties in the rohe already dispose of organic waste through composting at home or feeding to chickens etc. I don't oppose however the small additional cost to ensure that this amount of organic waste is properly disposed of by those who aren't fortunate enough to have the space to dispose of it at home. Perhaps there could be the option of subsidised/free compost bins for rural properties rather than a waste collection service?

Needs to be an opt in only service as not likely to be used by rural/lifestyle properties (Townies put grass clippings in red bins). What about contamination meat/bones/rubbish in organic waste, rats, rot, won't it just all end up dumped anyway!? More wasted ratepayer money.

Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi?If you have selected Option 1, what are your main concerns about an organics collection service?**

Main concern is that I compost my own organics, and don't put them in my red bin. Would I be able to opt out of organics collection and not pay the rates increase?

Q3. **Mēnā kua tohua ko Option 4, 5 rānei, kei te whakaae koe kia kohi o para ia rua wiki, ā he pai ki te utu he \$35 ki te kohi o para ia wiki?If you have selected Options 4 or 5, do you agree with fortnightly rubbish collection, or would you want to pay an extra \$35 per year for weekly rubbish pick up?** I agree with fortnightly rubbish collection

Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi?If you have selected Option 1, what are your main concerns about an organics collection service?**

That if the pickup interval was too long the organic waste would compost in the bins before pickup and become a health hazard.

Q3. **Mēnā kua tohua ko Option 4, 5 rānei, kei te whakaae koe kia kohi o para ia rua wiki, ā he pai ki te utu he \$35 ki te kohi o para ia wiki?If you have selected Options 4 or 5, do you agree with fortnightly rubbish collection, or would you want to pay an extra \$35 per year for weekly rubbish pick up?** I agree with fortnightly rubbish collection

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

It would be good if the process used to treat the green waste meant that the final product could be available for reuse in the community ie. if composting then the compost could be used on public gardens or restoration plantings.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

I currently pay over \$300 a year to have my 240L green waste bin collected fortnightly so the proposed FOGO option would be a significant cost savings for my household.

Q1. **He aha tāu e pirangi ai mo te kohinga pararopi? What is your preferred option for organic waste collection?**

Option 1 - Business as usual (no organics collection)  
Option 2 - Garden organics collection only (GO)

Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi? If you have selected Option 1, what are your main concerns about an organics collection service?**

Food organics can be composted. Families with children require weekly bin pick up for things like nappies (one baby can go through 30+ nappies in a week).

Q3. **Mēnā kua tohua ko Option 4, 5 rānei, kei te whakaae koe kia kohi o para ia rua wiki, ā he pai ki te utu he \$35 ki te kohi o para ia wiki? If you have selected Options 4 or 5, do you agree with fortnightly rubbish collection, or would you want to pay an extra \$35 per year for weekly rubbish pick up?**

I would prefer to pay \$35 extra for weekly rubbish collection

Q4. **Kei i a koe ētahi atu whakaaro? Anything you would like to add?**

Consider whether it might be more cost effective to simply supply free households with a compost bin for food waste.

Q5. **Kei te pīrangi koe ki te kōrero ki te Kaunihera? Do you wish to present your comments to Council at a hearing?**

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

Garden Organics would significantly cut down on having a compost pile on the lawn which makes for an unsightly amount of waste. I believe it would be a good use of taxpayer money since going to the landfill and paying to empty your green waste can be expensive of course that said businesses that produce green waste like gardening or lawn mowing businesses should still have to source their own means of dumping said waste since allowing them to take advantage of this service would mean less money coming in to run the service. I do think however that this is just one minor step in solving our environmental impact issues, if at all possible service vehicles like waste collection should be converted to electric power since it would cut down on carbon emissions and noise pollution.

I use to live in Tauranga and they have this service although a small bin for food scraps,it's helpful yet stinky. I also had to pay for another bin for my lawn clippings which i also used for my food scraps and other greenwaste. This proposed service would be helpful for me now that I reside here. With rising prices for living, paying for a greenwaste bin again like I did in Tauranga will be yet another stretch for my dollar.

This is a great initiative, I agree that alot of food waste is going into rubbish collection so it is good to see another option. Fortnightly collection may see more animals getting into bins and more maggots, flies, smell etc. Is there anyway to combat this if it is fortnightly?

Q1. **He aha tāu e pirangi ai mo te kohinga pararopi? What is your preferred option for organic waste collection?** Option 5 - Mixed food organics and garden organics (FOGO) collection

Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi?If you have selected Option 1, what are your main concerns about an organics collection service?**

not answered

Q3. **Mēnā kua tohua ko Option 4, 5 rānei, kei te whakaae koe kia kohi o para ia rua wiki, ā he pai ki te utu he \$35 ki te kohi o para ia wiki?If you have selected Options 4 or 5, do you agree with fortnightly rubbish collection, or would you want to pay an extra \$35 per year for weekly rubbish pick up?** I agree with fortnightly rubbish collection

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

Having organic waste collected would be amazing! Especially for those in short term accommodation or without the space to compost but they want to! Imagine how much waste would be diverted from landfill! Plus I would buy commercial compost off the council which makes the council an additional form of income!

- I would prefer to pay \$35 extra for weekly rubbish collection
- 
- Q4. **Kei i a koe ētahi atu whakaaro? Anything you would like to add?**
- Have chosen 3 options: - Option 4 is preferred provided that food organics are collected weekly. Happy to pay \$35 per/year to do this. With regards to garden organics, happy for this to be done fortnightly. - Option 5 is workable provided bins are collected weekly, if not; - Option 4 is preferred and food organics will be composited onsite as currently doing.

If rates were to increase for this service I would vote no altogether. Home owners pay an excessive amount for rates already.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

We compost at home & get regular green waste removals, so this won't change much for us, and arguably will cost us more in our rates. However, I believe it's necessary for those who don't have the same systems we do - it has to be easy or people won't do it. We have to make a change & redirect organic waste from landfill before it's too late. This is just one of the many things we could do to be cleaner, greener & reduce our carbon footprint

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

We currently compost our food scraps at home and have a green bin for our garden waste through a private company. We love it and so I support better access to this for the whole community. Due to our composting, recycling, and green waste bin, and as we are only a two person household, we only put out our red bin every 3-4 weeks at most, so I also support the change to fortnightly collection for red bins, as it will hopefully encourage people to reduce the amount of rubbish they generate.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

It's probably about time we had something like this. I also believe that non-organic rubbish should be collected once or twice a year to reduce illegal dumping. Similar to how Auckland allows you to leave non-organic trash on the side of the road once a year, then the Dump trucks come and retrieve it or people go around and will utilise it as treasure.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

The sooner the better. While this will be an additional cost to ratepayers I believe I pay more than \$51 taking green waste to the landfill each year anyway.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

We currently pay for fortnightly garden waste, it is a large bin same size as the yellow recycling bin and it works perfectly. We would like to also continue with the current weekly rubbish and fortnightly recycling collection. We compost our food waste easy to do and great for feeding the vege garden, maybe more education on the benefits of composting may avoid having to do the food/garden organics combined bin. I think it is good to avoid food in the green waste bin would make it less smelly too.

Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi?If you have selected Option 1, what are your main concerns about an organics collection service?**

I don't have any concern. I currently do my own garden and food organics but for those that don't have one, a weekly pick up would be great. Does this only apply to those that take up this service as I would hate to be charged for collection when I don't use it.

the costing model should show the anticipated increase in cost to get rid of red bin waste, so separating out compostable waste will reduce the volume of red bin waste overall

I have 2 worm farms and a compost. There is a lot of food groups that can't go in compost, bones, onion, orange peels for example, and they go in the red bin at the moment. It'd be great to have a collection for that sort of food. I have too much garden waste to manage. I feel bad putting it in the red bin.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

I chose the fortnightly option for cost reasons, but do have a concern about food waste rotting in bins during the summer period. You may like to suggest options to people such as bagging food waste and putting it in the freezer until just prior to collection day. This does put the onus on having spare freezer capacity. Having said that, I won't be needing this service as I manage all of my organic waste on my property. However, I'm happy to subsidise others though through paying for service in my rates.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

Proper education around FOGO disposal for kerbside collection is very important here (regardless of which option is chosen). This could be combined with the needed reeducation about recycling practices in Rotorua too.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

If composting, cooked food waste cannot be processed so will still be in the rubbish collection - eg bones, cooked food etc that cannot be composted.

Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi?If you have selected Option 1, what are your main concerns about an organics collection service?**

I live rural and I do not have any organic waste, household or from garden. I use all of mine up on my own land via chickens or compost. I do not want to have to pay for a service that I would not use and hope that there should be an option for the ratepayer to opt in or out. I do support the idea that the green waste from town should be composted instead of buried, or send it to the new plant in Reporoa. But rural parts should be excluded or at least given an option

We have our own compost bins for food scraps (and indeed ALL people should have these - or at least some outdoor area if not a bin)! However, it would be great to have somewhere for garden waste and lawnmower clippings etc. Fortnightly collection would halve the emissions from the collection trucks as well as fossil fuel usage.

having an organics waste collection bin would really help our house. on some days (when we do our lawns/gardening) we cant fit the waste in our bin along with the rest of our rubbish, sometimes we have to take it to my parents house to see if they have space in their bin or go to the dump. this would be so much easier and would encourage people to think about their food/garden organics

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

I support some kind of organic waste collection. Currently we have a compost bin and this works great because we use the compost in our garden. However we are moving to a house with a smaller backyard and will struggle to have space for a compost bin and more problematic, won't have a garden to consume the compost. We will pay for a waste collection to solve our problem, because we can afford to and know the unsustainable nature of binning organic waste. I agree that home composting is great, but not everyone has the space, skill or need required to make composting work well. Organic waste going gross in our collection bin is no different from organic waste going gross in our rubbish bins. Organic waste is pretty gross no matter where it goes. We need to do something about the volume of organic waste that goes to landfill. To help get people on board there needs to be clear and unquestionable data on how much organic waste is currently heading to landfill and what that means for us now and our future generations. People will gripe about the cost no matter what, but it's harder to do that when the problem is well defined. I don't agree with opt out options because you compost. This will be impossible to police. The price needs to be paid by all rate payers. Paying more is stink, but we or our kids will pay ten fold for our passive inaction if we do nothing. Thanks, Jen

- I think regardless of HOW this happens, the fact is that we need to be more sustainable and I fully support an initiative to collect organic waste. We also have a huge issue with recycling in general so that is another set of issues we need to account for. I'm thaknful this is happening.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

Need to factor in that some people have existing personal compost bins / worm farms that deal with their organic waste. Would they be able to opt out from getting a green bin (and thus not have to pay any fee)? Also please don't go with Option 4. The thought of having 5 different bins is not a happy one, especially if you don't have the space to store them all (think blocks of flats/apartments) or there is limited kerbside collection space.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

Great you are doing this. It took me a bit of time to work out the difference between options 4 and 5. I wondered if there were any benefits to separating out food waste from garden waste? Also, would love to compost my dog poo. Right now I put it in the red bin. Any suggestions for this? Dog poo actually accounts for a fair bit of the waste I produce. I don't put a great deal else in the red bin apart from Hoover dust and those bloody tetra packs. I would love it if these could be re-cycled please! Thank you. this is all great. I would also love to have free/cheap home compost bins via the council. This was something done in the UK years ago. Thank you again. This is all great stuff!

Q1. **He aha tāu e pirangi ai mo te kohinga pararopi? What is your preferred option for organic waste collection?** Option 5 - Mixed food organics and garden organics (FOGO) collection

Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi?If you have selected Option 1, what are your main concerns about an organics collection service?**

not answered

Q3. **Mēnā kua tohua ko Option 4, 5 rānei, kei te whakaae koe kia kohi o para ia rua wiki, ā he pai ki te utu he \$35 ki te kohi o para ia wiki?If you have selected Options 4 or 5, do you agree with fortnightly rubbish collection, or would you want to pay an extra \$35 per year for weekly rubbish pick up?** I agree with fortnightly rubbish collection

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

I think organic-waste collection is an awesome idea :) I love composting but our amazing climate means things grow so quickly; we often find ourselves with too much organic waste, as a result. Sending excess to a sustainable resource, instead of landfill, is a no-brainer!

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

I applaud RLC for moving this important issue forward in Rotorua. While Option 5 would be ideal, even a food waste only option would be a significant step towards improving the sustainability and climate change impacts of Rotorua households.

I feel a weekly summer collection with a fortnightly winter collection of FOGO would be ideal. The hotter weather results in more smell, which a much lesser issue in winter. Could this be a possibility? The presentation was excellent, and was an excellent method to get the message across to a Science based business whos mandate includes a circular economy.

Along with obviously an addition bin for organics, it would assist households if a smaller container, about 2L size container was also distributed to households to place the kitchen organics into and then empty into the organic wheelie bin, having a smaller bin in the kitchen would encourage and be seen as a visual prompt to put your apple cores, etc into that and not be discouraged that you need to walk out side every time you finish an apple.

Q1. **He aha tāu e pirangi ai mo te kohinga pararopi?** Option 5 - Mixed food organics and garden organics (FOGO)  
**What is your preferred option for organic waste collection?** collection

Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi?If you have selected Option 1, what are your main concerns about an organics collection service?**

not answered

Q3. **Mēnā kua tohua ko Option 4, 5 rānei, kei te whakaae koe kia kohi o para ia rua wiki, ā he pai ki te utu he \$35 ki te kohi o para ia wiki?If you have selected Options 4 or 5, do you agree with fortnightly rubbish collection, or would you want to pay an extra \$35 per year for weekly rubbish pick up?** I would prefer to pay \$35 extra for weekly rubbish collection

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

The reason I'd like a weekly rubbish collection - if we miss it (which is very easy to do when it's fortnightly and you don't remember whether it's a collection day or not) then the rubbish could be sitting around for 4 weeks

Q5. **Kei te pīrangi koe ki te kōrero ki te Kaunihera?** Kāo - No

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

I live in a two person household, but even when we have extended family visiting, our red bin is rarely full and I don't put it out every week. It is mostly food waste and unrecyclable packaging. I already pay for green waste collection monthly, and due to the size of our garden might still need to pay for additional, especially in autumn. I strongly support FOGO collection as the most important action that council can take to impact the community's waste carbon footprint. It makes sense to go for the most effective option to achieve that objective in line with Council's Climate Action Plan.

The fortnightly red bin collection is good in theory but It would be good to be able to increase the red bin collection frequency if after 6months or so it was required. Especially for households that find it hard to reduce non-recyclables/non organics - eg. Disposable nappies/wound dressings etc.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

One of either options 4 or 5 are essentially the only options acceptable in the wider national waste management requirements. There is almost no room for meaningful discussion as there is a wider debate necessary on lifting reduce, reuse, and recycling rates with suitable incentives.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

Council must change rubbish collection to fortnightly. Average household waste generation in Rotorua is over 10 kg per week, which is huge. A large 140 L bin is partly responsible for this. Organics diversion is a great idea, but our waste (to anywhere) should also reduce.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

Have bin size options for rate payers to select and pay for accordingly. Example I will likely prefer a large green waste bin. A retired elderly person may only require a small general waste and organic waste bin and perhaps should be charged less than they currently are.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

We congratulate RLC for taking the initiative in this area and support the kerbside collection of organic waste in Rotorua. For those of our member businesses who utilise the RLC waste collection services, this is another important step in providing choices for reducing waste to landfill.

It increases the cost to ratepayers of already extremely high rates and I think that many people would still put their food scraps in the red bin as they couldn't be bothered separating rubbish. People who do care about where their rubbish goes like me will already be worm farming or composting.

I am pro the best environmental choice. There is not much information between the disposal of options 4 & 5. A the Rotorua Landfill I believe, currently green waste at the dump is being turned into compost etc which is great. If it was a combined FOGO is the end usage of that material less useful? We home compost (food and green waste) but often have overflow that goes into the red bin. I'd appreciate any of the options to reduce waste in red bin.

Q1. **He aha tāu e pirangi ai mo te kohinga pararopi?** Option 1 - Business as usual (no organics collection)

**What is your preferred option for organic waste collection?**

Q2. **Mēnā kua tohua a Option 1, he aha ō āwangawanga mo te kohinga pararopi?If you have selected Option 1, what are your main concerns about an organics collection service?**

The cost of the service - my rates are high enough as it is, thank you very much!; I don't want the service - our household doesn't produce food scraps or green organic waste; I don't believe that many people in Rotorua will use the service; I don't believe many people will use the service without contaminating the organic waste bins with inorganic matter, thus negating the value/effectiveness of the service; The council hasn't disclosed what percentage of the ratepayers want this service, or have asked for it; It's not voluntary; The cost to restaurants/cafes/motels/backpackers/etc hasn't been disclosed; The REAL cost to the environment of having MORE trucks on the road, and MORE plastic bins hasn't been disclosed or discussed; There's no benefit to consumers in having the food/organic waste composted by private companies rather than in landfill - and having to buy any refined waste product (in the form of compost, methane, etc) is charging ratepayers twice for the service; There's no clear idea of where the waste will go, or what's going to be done with the waste product once it's been collected; No consideration has been given to the likelihood of waste being spilled onto roadways and into the general environment during transport, polluting waterways and the landscape, and also potentially making roadways slippery and dangerous; There's been no discussion or consideration of capping Rotorua's population as a way to stabilize or reduce our climate emissions, rather than seeking new and innovative ways to offset the emissions and waste produced by our deliberately enlarged population; With fuel supplies being restricted, and prices rising steadily now, the service will not be economical for long, and will very quickly require large/frequent price hikes to keep up with the cost of fuel, making the service very quickly VERY unaffordable for ratepayers; With the coming food shortages, significantly less food scraps will be put out for waste collection, negating/greatly reducing the need for the service, and thus reducing the refined/treated waste product available to wholesalers/consumers; Since NZ produces only 0.1% of the worlds greenhouse gas emissions, meeting or exceeding our emissions targets will make NO DIFFERENCE WHATSOEVER to the environment, or to global temperatures, or whatever.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

While I certainly appreciate the opportunity to critique this proposal (for a change), it's clear that this is a poorly considered, and poorly researched knee-jerk-reaction proposal, that doesn't take into account the needs or wants of ratepayers, nor the REAL cost to the environment. It's merely expensive virtue signaling - at the expense of ratepayers (again!).

- 
- Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**  
I like the proposal to reduce the frequency of (red bin) rubbish collection. This encourages us as consumers to re-use, repair, and to return products to the manufacturer.

Due to cost of living crisis to many rates hikes occurring in a short period Option 1 preferable. However overall Option 5 is ideal.

Q4. **Kei i a koe ētahi atu whakaaro?Anything you would like to add?**

Two things: It will be a bit difficult to make the space for another wheelie bin at my property. Also a comment, I have friends in Hamilton who now have a food collection bin and it smells so bad in summer that they don't use it and put their food waste in their red bin instead.

Presumably food items tend to be the smelly waste as option 5 - Missed food and organics is picked up weekly, while Rubbish (Plastic, Bottles, Tins etc) will be okay fortnightly - and substantially cheaper increase - \$5 Are there any major problems in separating food waste from garden waste? If so, then option 4 may have to be the next best but pricey.

It is a additional cost that many can't afford and won't use, for example we have scrap buckets which go to our pigs, chickens etc and we have compost bins for other waste. This service is not a service we require and I know many other in the same boat.

Suburbs would need different collection than denser dwellings without gardens (apartments), but these are not common in Rotorua. Continue the training about worm farms for suburbs and that would reduce the need for food organic collection. I haven't thrown away any food (except bones) since I got the training on worm farms and the basic kit some years ago, funded by RLC.

## 1. INTRODUCTION

- 1.1 Federated Farmers appreciates this opportunity to submit on the consultation information prepared by Rotorua Lakes Council (**RLC or Council**) on Te Kohinga Pararopi - Organic Waste Collection (**OWC**).
- 1.2 We acknowledge any submissions from individual members of Federated Farmers.
- 1.3 Federated Farmers is focused on the transparency of rate setting, rates equity and both the overall and relative cost of local government on rural ratepayers. We note with concern the ever-increasing upward trend of all Council rates, fees, and charges.
- 1.4 Federated Farmers is conscious that there may be significant 'consultation fatigue' out in the community, following the LTP consultation process and 18 months' worth of significant central government proposals.
- 1.5 Our members do not want their busy silence to be misconstrued as disinterest in rates or the proposed changes. Given the challenging regulatory and economic environment we are currently in, we acknowledge this may result in a low response rate to the consultation process.
- 1.6 Our submission provides general comments on the proposed OWC, comments on proposed solutions, and makes recommendations for enhancing rural waste services.

## **2. GENERAL COMMENTS**

- 2.1 Federated Farmers congratulates RLC on producing transparent consultation documentation, which clearly outlines options to ratepayers.
- 2.2 Federated Farmers is generally supportive of the objective of RLC to send less household waste to the landfill, which then helps to lower emissions (a priority under the Climate Action Plan).
- 2.3 We note however, that the consultation documentation is silent on rural waste which is extremely disappointing. The consultation document proposes that all urban households that currently receive the kerbside (yellow bin) recycling service would receive an additional (green) bin for organic waste.
- 2.4 We would appreciate a response from Council as to why rural ratepayers, some of whom have access to kerbside collection currently, are not included in the organic waste solutions proposed by RLC.
- 2.5 We would like to take the opportunity to remind Council that there are rural access inequities to waste recovery and recycling services in the Rotorua District. While the proposed options may not be wholly fit for purpose for rural areas, the exclusion of rural rate payers from alternative waste streams for their household waste does nothing to address this.

## **3. COMMENTS ON PROPOSED OPTIONS**

- 3.1 We can appreciate that the implementation of an organic waste collection for urban households is a worthwhile step for Council address rising costs, meet new and emerging regulations, reduce greenhouse gas emissions, and commitments in the Long-Term Plan 2021-2031.
- 3.2 We note that often food organics for many households in rural areas can be utilised for feeding animals such as chickens and pigs. Further, garden organics are not a prevalent issue as often farmers have compost heaps, or are able to let organics biodegrade naturally on farm.
- 3.3 The consultation document notes that there are five potential options for the service. Each proposed option has a different diversion rate from landfill and proposed frequency of collection from the kerbside. Each option has a different cost associated for each household.
- 3.4 Federated Farmers want to ensure that the proposed costs per household will only apply to urban based households, given that is the extent to which the organic waste collection will service. We support user pays services, and as such urban users should be solely paying for such services.
- 3.5 We would appreciate confirmation from Council that rural ratepayers will not be required to contribute towards the costs associated with urban organic waste collection, regardless of which option is preferred moving forward.

## **4. ENHANCING RURAL WASTE SERVICES – RECOMMENDATIONS**

- 4.1 We have multiple suggestions for RLC to consider, to provide alternative waste streams for rural rate payers.
- 4.2 While we have acknowledged that many households in rural areas have the means for dealing with food and garden organics, we believe that there should still be an alternative option available. RLC already has four rural transfer stations (Mamaku, Reporoa, Okere Falls, and Tarawera). We believe it would be extremely useful if there was a 'drop-off' option for food scraps available at these locations (we note that certain green waste can already be

disposed of). This initiative will enable rural people to have the option to dispose food organic waste appropriately.

- 4.3 We also understand that for example in Reporoa, a large-scale food waste to energy facility is currently being constructed by Ecogas. We would like to see Council working with such facilities to allow for a 'drop-off' option for food scraps for rural based people and the wider community.
- 4.4 As previously noted in our submission to the Year 2 delivery plan for the Long-Term Plan, Federated Farmers would also like to see Council actively working with AgRecovery to establish free drop off hubs for farm plastics.
- 4.5 AgRecovery is seeking product stewardship accreditation from the Ministry for the Environment (**MfE**) for farm plastics in 2023/34. AgRecovery estimates it will recover 80% of farm plastics within three years of accreditation. This will have a meaningful impact on rural waste streams and therefore reduce pressure on Council landfills. However, those recovery facilities need to be planned for to ensure the service is accessible for all rural people.
- 4.6 Establishing such facilities in rural areas would be a win for Council for its rural rate payers, while also providing alternative solutions to landfill for a common farm waste stream.
- 4.7 We are of the opinion that council should be encouraging and incentivising the recommendations proposed to enhance rural waste services. We would appreciate a response from Council as to whether our alternative waste stream solutions will be considered by Council in the foreseeable future.

Federated Farmers thanks Rotorua Lakes Council for considering our submission.

Federated Farmers is a not-for-profit primary sector policy and advocacy organisation that represents the majority of farming businesses in New Zealand. Federated Farmers has a long and proud history of representing the interests of New Zealand's farmers.

The Federation aims to add value to its members' farming businesses. Our key strategic outcomes include the need for New Zealand to provide an economic and social environment within which:

- Our members may operate their business in a fair and flexible commercial environment;
- Our members' families and their staff have access to services essential to the needs of the rural community; and
- Our members adopt responsible management and environmental practices.

This submission is representative of member views and reflect the fact that local government policies impact on our member's daily lives as farmers and members of local communities.

**Subject:** Green waste collection in mamaku

Hi

As a rate payer in mamaku area we have been advised that we can comment on the options in regards to the new proposed green waste collection options.

I feel that in the country /out of town area of mamaku having a green waste collection would be a waste of time.

Majority of people have gardens and or animals that will eat the wastes

My family would not be using the service

Thanks

Sally

**Subject:** opting out of the compost scheme?

Hi,

How do I opt out of the compost scheme? I have chickens and a compost and will not use it.

Thanks,  
Dave

**Subject:** Attention: Megan Cooper "Te Kohinga Pararopi - Organic Waste Collection"

I attended the meeting in the East area. I would like to support three councillors hard work about WMMP finally getting finalised soon,, despite some against people complaining about extra cost which is only \$51/year, I wanted to talk to them if I could, saying like we consumers have to shop wisely and carefully not to produce rubbishes( things in plastic and container. too much food to waste at the end) at first when spending our own precious money. Then the total amount of red bin rubbish, food organic rubbish and recycling yellow bins will be much less, even better if every household was responsible about producing our own rubbish and making it compost to make its own rich soil and liquid fertiliser, which is win-win. I spent a lot of money to subscribe to Whywaste worm farm compost to learn how to reduce kitchen waste to go landfill, instead making my own garden fertiliser and now after 2 years I had to buy that hungry-bin\$400 to finish the subscription. I use Bokashi compost to use other food rubbish not going to the worm-bin, which amazingly works to reuse the paint buckets, after fermenting bokashi goes to another hot/cold compost ,which was made with unwanted pallets?? to reuse,with my garden green waste and brown cardboard and fallen leaves from the park etc. even in my small garden. I research and try hard to reduce our household rubbish and choose the way not to create them, which is not hard at all. Then there is no rubbish in my red bin to put at kerbside,,so may be FOGO bin will be empty as well,, So these conscious people like me must be there some should be rewarded a lot, should be not treated the same as people who never feel embarrassed what they put and mix in the bin without thinking about anything urgent environmental crisis, like my next door's red bin is full every week never close the lid... wishing the council need to put notice to those house to educate, even they might say that they have a right to put any rubbish out to be corrected as paying the expensive rate, but we all do if we live in the clean community, unfortunately. Every one of each household has to act NOW something to start like composting, not to wait another two years before starting this system.

FOGO is good idea for the elderly people and for the next generation with more population growing in this country and for one of the solution of never ending environment problem, the little extra cost can not be helped but we should realize that we are fortunate to live in this country by all means compared to the other world, and thank people who does hard dirty jobs for us to live cleanly..

kind regards  
Junko Tanaka

To our council in regards to the collection of food and green waste in Mamaku.  
As a citizen and ratepayer of Mamaku oppose this proposed scheme for various reasons.

First and foremost, we recycle our own and being rural that's easy to do with increased property sizes.

Second, the whole process of being greener as explained by Councilor Fisher does not make sense, has not been thought through enough having many contradictions and omissions in it with too many variables unanswered.

Third, the whole system of collection, including the production of new plastic bins, add huge amounts of pollution in different ways than the current NATURAL process of decay of green & food waste

That this is natural and BENEFICIAL and GOOD for natural cycles can be clearly seen in forests where it is standard procedure to leave green waste, branches, tree stumps and anything else to recycle back into the ground and in doing so give a habitat for many good bugs, bacteria and insects.

Lastly

The 'remanufacturing' of this 'waste, so called to stop methane from entering the air which is again a natural thing, is not stopping that same methane to be produced its just in a different location as the breaking down will happen during the manufacturing process and later when the compost is added to the soil.

This whole scheme is thus based on wrong principles, bad science ( biology is biology) and wrong statistics only to show a manufactured desired outcome. It is a push for something that is taxable only to increase revenue and pays lipservice to a greenies agenda and to control the people.

I reject this proposal and do not agree to rate increases as per the proposal.

Kind regards  
Remko Schipper

4. Anything you would like to add?

Have bin size options for rate payers to select and pay for accordingly.

Example I will likely prefer a large green waste bin

A retired elderly person may only require a small general waste and organic waste bin and perhaps should be charged less than they currently are

4. Anything you would like to add?

Presumably food items tend to be the Smelly waste so option 5 - Mixed food & Organics is picked up weekly, while Rubbish (plastic, bottles, tins etc) will be dry fortnightly - and substantially 'cheaper' increase \$5!

Are there any major problems in separating food waste from garden waste? IF SO! THEN OPTION 4 May have to be the next best but pricey.
