

Marguerita Street Engagement Night - Businesses 7 July 2020

- Create some extra parking in White Street/Marguerita for trucks/heavy vehicles to queue off of the road and away from the residential area
- Improve Fenton/Malfroy and Fenton/Ti Street intersections and encourage traffic through that route to alleviate traffic through Marguerita Street
- Add in pedestrian crossing to increase the safety for people crossing Marguerita Street and would also help to calm traffic near the Fenton Street end.
- Council could work with VTNZ to encourage a better system for trucks getting COFs so that the queueing trucks don't impact so much on residents.
- Council should consider traffic light sequencing so traffic along Te Ngae would be stopped/slowed and allow trucks to exit onto Te Ngae more easily.

Questions

- Are numbers relevant to the decision making process?
(The number of staff/customers/clients for the businesses on White Street affected by adding chicanes or cul-de-sacs would far outnumber the amount of residents who are asking for chicanes or cul-de-sacs.)
- Has Council considered the economic impact of the proposed changes to Marguerita Street?
