

MARGUERITA STREET

TRAFFIC MANAGEMENT & ROAD SAFETY IMPROVEMENTS

CONSULTATION OPTIONS:

1. Status quo – keep the road as it is. Council would continue to monitor and enforce parking issues
2. Reduce traffic speed, volume of traffic and vehicle movements by installing traffic management features e.g. chicanes or narrowing the road
3. Remove ability to travel through Marguerita Street by closing the road

RECOMMENDATION

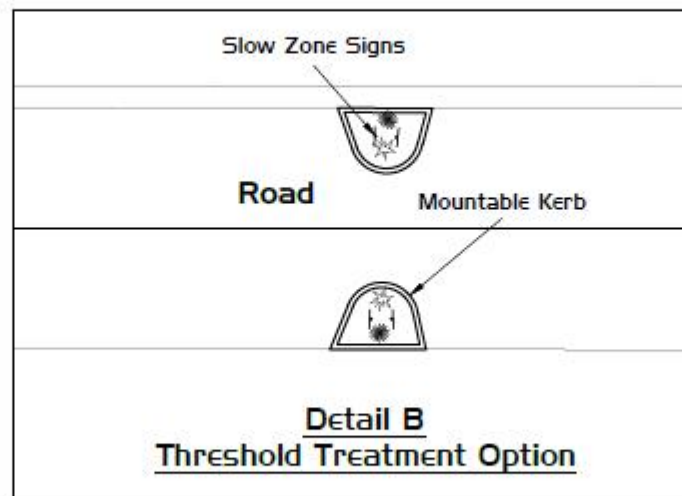

Option 1 - Status quo

Officers propose to respond to residents concerns through the introduction of some traffic management measures:

- Installation of a formal pedestrian crossing
- Additional threshold markings on both ends of the residential areas to highlight the presence of local residential activity
- Additional physical restriction of the lane widths to encourage lower speed limits

...s are 125m apart
