Increasing Housing Supply

OUR RESPONSE

Less 'Growing Out'

More 'Growing Up'

Still need a mix of both

WHY GROW UP?

Better access to schools, jobs, parks and shops

Less car dependent

More people means vibrant neighbourhoods and centres

More efficient use of infrastructure

Protects rural areas

ROTORUA

ENCOURAGING GOOD DESIGN

- MfE design guidance for permitted development (up to 3 dwellings)
- Urban design assessment for 4+ dwellings
- Supporting design focussed on multi-unit development
- Consider things like:
 - On-site amenity;
 - Streetscape interface;
 - Privacy;
 - Site layout/ building position;
 - Design quality

3.1 BUILDING MASS AND HEIGHT

Set upper storeys back from side boundaries so to locate building mass away from adjacent properties.

When determining a building's mass, consider what is appropriate for the size, shape and topography of the site.

Use building height in key locations to signal a landmark building or significant corner site.

Hobsonville, Auckland
Setting back upper levels can create additional privacy.

Kerewhenua Apartments, Hobsonville
Uses additional height at the corner to create a landmark building.

Rangiora Social Housing Development -
Manipulating the building form can create modulation and visual interest.
