## **Rotorua Lakes Council's preference, where possible, is to send correspondence electronically.**

This ensures our letters and notices get to you as quickly as possible.

It's also a way to contribute towards a reduced carbon footprint, by minimising the amount of paper we use.

### **Many Council customers already receive accounts via email.**

We want to encourage more people to sign up.

We also want people already signed up to check that we have the correct, up-to-date details.

### **Add your mobile number**

Adding your mobile phone number to your contact information means you can also receive confirmation of requests for service and notifications once a request has been completed.
