

Rotorua Lakes Council

TRADE WASTE

In July 2021 RLC joined the Waikato Local Authority Shared Services trade waste team to deliver integrated, sustainable and well-managed services. Improved compliance, monitoring and auditing will protect and enhance the environment and protect our wastewater network and treatment plant.

Trade waste customers will receive a consistent trade waste service across the partner council territories, while shared staff and resources will ensure a streamlined and efficient business model - an effective user pays approach to trade waste,

The following fees and charges for Council's Trade Waste services are effective from 1st September 2021 to 30th June 2022. All fees include GST. The application fee, hourly rate and inspection fee have increased by 2% p.a. since the last review, the treatment cost by 4% p.a. The annual charge covers the cost of improved compliance, monitoring and auditing. Permitted/controlled consent will be issued for a period of 3-5 years rather than annually.
