Amendments to Ten Year Plan 2009-2019

Amendments to Ten Year Plan 2009-19

Background

Long Term Council Community Plans (LTCCPs) are required to be reviewed every three years. In the intervening years councils can accommodate variances to the cost of delivering the activities in the LTCCP through the annual plan process. This also enables councils to determine revenue requirements and set rates on an annual basis.

If councils wish to make significant changes or alter levels of services or policy outside of the scope of an annual plan, they must use the Special Consultative Procedure (SCP) to do this.

It should be noted that these amendments do not reflect non material changes to activities or the annual budget for activities, as these matters are covered in the Annual Plan.

The reasons for the amendments are:

- 1. To enable Council to more effectively implement or undertake the activities included in the Annual
- 2. To incorporate new policy or revisions to existing policy.
- 3. To provide improved clarity, or assist with interpretation of the plan.

Index to amendments

Amendment 1:117
Rating Policy (Removal of general rate differential category for Council property)
Amendment 2:118
Rating Policy
Establishment of targeted rate for connection cost to Mourea sewerage scheme
Establishment of targeted rate for connection cost to Hinemoa Point sewerage scheme
Amendment 3:
Expanding Rotorua waste minimisation services
Report of the Auditor General122

Rating Policy (Removal of general rate differential category for Council property)

Reason:

To incorporate new policy or revisions to existing policy.

Part C Financial Statements and **Supporting Information**

Page 63 Volume 2 of Ten Year Plan 2009-19

Background

Council, when preparing the Ten Year Plan 2009-19 and Rating Policy, continued with the policy of rating Council property all as though it was Business Urban.

While this practice mostly resulted in no additional cost to ratepayers, it did have the effect of there being high rates for Council's residential property.

Consequently if Council was selling any of these properties, it adversely affected the "saleability" of these properties.

Effect of amendment

Council property will be rated according to the purpose for which it is used. This will mean that residential property owned by Council will be charged the same rates as other residential property with the same value.

Amendment

Differential General Rate categories:

		Relative differentials for the general rate						
Res	sidential rating categories							
1	Residential – General Urban	100%						
2	Residential – General Rural	76%						
3	Residential – Two Unit Urban	110%						
4	Residential – Three Unit Urban	230%						
5	Residential – Four Unit Urban	300%						
6	Residential – Multi Unit Urban	360%						
Far	Farming rating category							
7	Farming – General	76%						
Bus	Business rating categories							
8	Business – Urban	360%						
9	Business – Rural	228%						
Council rating category								
10 Council Property 380%								

Rating Policy

- Establishment of targeted rate for connection cost to Mourea sewerage scheme
- 2. Establishment of targeted rate for connection cost to Hinemoa Point sewerage scheme

Reason:

To incorporate new policy or revisions to existing policy.

Part C Financial Statements and **Supporting Information**

Background

Council has recently constructed new lakeside sewerage schemes as one of the ways to improve Rotorua lake water quality. However, for two of these schemes a number of residents remain unconnected for one reason or another. Council has subsequently decided, pursuant to Section 459 of the Local Government Act 1974, to connect all properties capable of being connected that currently remain unconnected for the Mourea and Hinemoa Point sewerage schemes.

New targeted rates will be established to recover the cost of this work.

Effect of amendment

Residents in the Mourea/Okawa Bay sewerage scheme area and not connected to the scheme at 1 July 2010 will be charged a new targeted rate annually to fund the cost of connecting to the scheme.

The sewerage scheme connection (Mourea) rate is set at:

2010/2011

\$228.31 (plus GST)

The amount to be collected is \$6,935.00 per annum (GST exclusive).

Residents in the Hinemoa Point sewerage scheme area and not connected to the scheme at 1 July 2010 will be charged a new targeted rate annually to fund the cost of connecting to the scheme.

The sewerage scheme connection (Hinemoa Point) rate is set at:

2010/2011

\$137.49 (plus GST)

The amount to be collected is \$3,422.00 per annum (GST exclusive).

Amendment

- Included in the Rating Policy and Funding Impact Statement is a targeted rate for Sewerage Scheme Connection (Mourea) rate.
- Included in the Rating Policy and Funding Impact Statement is a targeted rate for Sewerage Scheme Connection (Hinemoa Point) rate.

Expanding Rotorua waste minimisation services

Reason:

To incorporate new policy or revisions to existing policy.

Introduction

As a result of submissions to the Ten Year Plan 2009-19 Council called for a detailed investigation and report into the best way of delivering recycling services for the future. Various options have been costed and residents had an opportunity to consider what level of service they require.

The prevailing view is that the existing recycling service was working well, with comparable levels of recyclable material being collected with a kerbside collection.

In the 2008/09 financial year, 3,630 tonnes of material was recycled through the existing drop-off centres, the majority of which (55%) was collected at the In-Town Recycling Centre. This equates to approximately 55kg per person recycled annually. The Rotorua District's current recycling level exceeds most other cities and districts who use a bag kerbside recycling collection, though is considerably less than those who use a wheelie bin service, but is at a significantly lower cost per ratepayer. The average cost of RDC's current In-Town Recycling Centre and rural drop-off centres is \$21.61 per property.

New waste minimisation initiatives were identified within one of the three key themes in the council's Ten Year Plan 2009-2019. The community outcome 'A community that respects its environment' also makes specific mention of waste reduction, re-use and recycling. The community wide discussion on waste minimisation and recycling services enabled Council to decide the appropriate service that meets the community's expectations, delivers acceptable levels of waste reduction through recycling opportunities and will be provided at an acceptable cost.

Summary of options considered

The following table outlines the key aspects of all waste minimisation and kerbside recycling options considered, including the advantages, disadvantages, areas covered and costs:

	Current Service	Option 1	Option 2	Option 3A	Option 3B	
Description of service	Status Quo – current provision	Bag Kerbside (Urban)	Open Crate Collection	Comingled Wheelie Bin (Urban)	Wheelie Bin, separate glass (Urban)	
Advantages	 Low costs Yield good compared with other options 	Some degree of user separationLow capital costs	 Some separation at collection point Low capital costs Contamination can be identified at source 	 Reduced health and safety issues due to automatic lifting Higher yields 	 Reduced health and safety issues due to automatic lifting Higher yields 	
Disadvantages	Only available for those prepared to transport material to centre	 Minor contamination issues Health and safety issues for collectors Lower yields than alternatives and possibly lower yield than existing drop-off Unsightly on residential streets 	 Health and safety issues for collectors Capacity of crate may limit yield 	 Higher capital cost, particularly sorting facility Contamination issues Specialist collection vehicles are required Vehicle access to bins can be difficult in areas with a lot of roadside parking External storage of wheelie bins Wheelie bins can be difficult for elderly and disabled 	 Higher capital cost Contamination issues Specialist collection vehicles are required Vehicle access to bins can be difficult in areas with a lot of roadside parking External storage of wheelie bins may be difficult for some residents Wheelie bins can be difficult for elderly and disabled 	
Area covered	District wide	Rotorua urban residential area	Rotorua urban residential area	Rotorua urban residential area	Rotorua urban residential area	
Increase in cost (\$):						
Operating Expenditure	\$0	\$970,000	\$1,000,000	\$1,770,000	\$1,190,000	
Debt Servicing	\$0	\$495,200	\$628,000	\$1,273,600	\$742,200	
Per property	\$0 – Currently costs an average of \$21.61 per property	\$76.47 – Targeted rate	\$84.97 – Targeted rate	\$158.85 – Targeted rate	\$100.85 – Targeted rate	
Loan(s)	\$0	\$4,510,000	\$5,720,000	\$11,600,000	\$6,760,000	

Expanding Rotorua waste minimisation services cont.

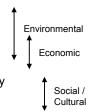

Option 4A		Option 4B	Option 5		
Description of service	Extend Drop Off Centre (All)	Extend Drop Off Centre (Ngongotaha) Plus Satellite Improvements to In-town Recycling Centre (All)	Allow private service		
Advantages	Lower cost to council	 Lower cost to council 	 No cost to Council 		
	 Encourages user separation and responsibility 	 Encourages user separation and responsibility 	 Completely user pays Residents can choose to use of 		
	 High quality product achieved at low cost 	 High quality product achieved at low cost 	not use the service		
Disadvantages	 May be perceived as lower level of service to kerbside 	 May be perceived as lower level of service to kerbside 	 Higher cost to those choosing to have such a service No specific incentive for private 		
	collections	collections			
	 Relies on people being committed to recycling and is unlikely to encourage more people to recycle than existing 	 Relies on people being committed to recycling and is unlikely to encourage more people to recycle than existing 	provider to reduce waste volumes		
Area covered	All areas of the district	All areas of the district	Individual choice – economic		
Increase in cost (\$):					
Operating Expenditure \$0		\$300,000	-		
Debt Servicing \$80,150		\$109,800	-		
Per Property \$0		Approximately \$14.66 extra in general rates paid by all properties	Private cost		
Loan(s)	\$730,000	\$1,000,000	-		

Detailed consideration of options

All options considered are for services to residential properties only. Currently private operators already collect approximately 2,100 tonnes of recyclables per annum from the commercial sector. At this stage there is no expectation that Council would institute a new service for the commercial sector, which already has access to the existing In-Town Recycling Centre.

Before reaching its preferred position, the council considered a number of factors in assessing the options. These are summarised in the points below:

- Waste Minimisation Effect
- Beneficial Reuse of Material
- Transportation Requirements
- Cost of Service
- Convenience / User Acceptability
- User Accountability
- Risks

More detail on all options is included within the report 'Solid Waste Assessment, Recycling Business Case'. The report is available on the Council website at www.rdc.govt.nz or by contacting the Council by telephone on (07) 348-4199.

After considering the advantages and disadvantages of each option and the submissions received Council selected option 4B.

Impact of Council's selected waste minimisation option

The following table shows the impact of Council's selected option (4B) over the period of the Ten Year Plan:

Changes (\$000)	2009/10	2010/11	2011/12	2012/13	2013/14	2014/15	2015/16	2016/17	2017/18	2018/19
Waste Management										
Direct Cost (Net) 1	-	- \$686	- \$490	- \$505	- \$520	- %535	- \$550	- \$565	- \$580	- \$600
Funding:										
Targeted Rates		- \$824	- \$848	- \$814	- \$900	- \$927	- \$955	- \$984	- \$1,013	\$1,043
General Rate	-	\$138	\$358	\$369	\$380	\$392	\$405	\$419	\$433	\$443

¹ Council had made provision in the Ten Year Plan 2009-19 to establish an improved refuse collection service from 1 July 2010 to be funded from targeted rates. Council has selected option 4B (improving the in-town recycling centre and establishing a drop-off at Ngongotaha) from 1 March 2011. The figures show the net cost of option 4B and changes to funding over the period of the Ten Year Plan 2009-19.

Expanding Rotorua waste minimisation services cont.

Summary

Following consideration of all submissions on this matter, Council has selected what it believes to be the most sustainable recycling option for residents of Rotorua District.

The extension of recycling drop-off centres, including provision of a new centre at Ngongotaha and improvements to the existing In-Town Recycling Centre will have a one-off capital cost of \$1 million to establish with additional ongoing annual operating costs of approximately \$352,500 per annum and the operating costs will be paid for from the general rate.
